**Motivations/Goals:** One of the top accountants at his company trying to get a promotion into a management position

**Frustrations/Problems:** Not very good at communicating what he really wants

## **FEATURES/FUNCTIONALITY**

**Login** - As a Customer, I would like a login function, so that I can store and review previous and ongoing orders.

As a Provider, I would like a login function, so that I can manage my stores online presence as well as storing and reviewing previous and ongoing orders.

**Restaurant Search** - As a Customer, I would like the option to search for a specific store, so that I can quickly find the exact store I am craving.

**“Feeling Lucky” Search** - As a Customer, I would like a randomizer search, so that I am provided possible options that I wouldn’t normally think of.

As a Provider, I would like a randomizer search, so that I have a chance of a customer finding my store even if they weren’t searching for me specifically.

**Cart** - As a Customer, I would like a place to store my potential purchases, so that I can get an overview of my entire purchase and have a chance to review exactly what I should be expecting.

**Checkout** - As a Customer, I would like to purchase the items in my cart, so that I can receive what I ordered.

**Status of Order** - As a Customer, I would like to be able to check on the status of my delivery, so that I can set proper expectations to receive the order.

As a Provider, I would like to be able to check on the status of the order, so that a Store Manager can review info about the order to identify issues or if a more efficient method would work better for the store
